## **New solution helps streamline payment processing through electronic payment request, secure messaging and bill pay**

**IRVING, Texas, Sept. 30, 2019**(GLOBE NEWSWIRE) -- Exela Technologies, Inc. ("Exela") (NASDAQ: XELA), a location-agnostic global business process automation ("BPA") leader across numerous industries, today announced its partnership with Vocalink, a Mastercard company, to deliver a "Request to Pay" solution in the UK. The solution is a core component of PAY.UK's "new payment architecture," its new conceptual model for the future development of the UK's shared retail payment infrastructure.

Set to launch in Q1 2020, Request to Pay enables consumers to electronically receive payment requests, view bills, and make real-time bill payments—all in one place. Request to Pay serves as a secure, unified messaging service, enabling users to communicate before bill payment takes place. User benefits include the simplification of the payment process, increased transparency into how and when bills are paid, and cost savings related to increased straight through processing and simpler reconciliation through greater use of structured data.

"Exela is focused on innovating and growing its global banking solution, bringing cost-effective, automated solutions to our financial services customers, and continuing to invest in our technology-enabled solutions," said Vitalie Robu, President, EMEA, Exela Technologies. "We are excited to debut Request to Pay, and by the overlay opportunities that Request to Pay enables, such as the ability to integrate Exela's cash management and liquidity platforms."

"Our Request to Pay solution is a new payment application that delivers significant benefits for all involved – consumers, businesses, and banks – providing more flexibility, speed and transparency of bill payments," said Gregor Dobbie, CEO, Vocalink, a Mastercard company. "It has the potential to transform the way we settle our day to day bills."

### **About Exela**

Exela is a business process automation (BPA) leader, leveraging a global footprint and proprietary technology to provide digital transformation solutions enhancing quality, productivity, and end-user experience. With decades of expertise operating mission-critical processes, Exela serves a growing roster of more than 4,000 customers throughout 50 countries, including over 60% of the Fortune® 100.
