# **About Non-GAAP Financial Measures:**

This earnings release presents certain non-GAAP financial measures including EBITDA, Adjusted EBITDA, Further Adjusted EBITDA, each of which is a financial measure that is not prepared in accordance with U.S. generally accepted accounting principles ("GAAP"). We believe that the presentation of these non-GAAP financial measures will provide useful information to investors in assessing our financial performance, results of operations and liquidity. We believe these non-GAAP measures allow investors to better understand the trends in our business and to better understand and compare our results. Our board of directors and management use EBITDA, Adjusted EBITDA, and Further Adjusted EBITDA to assess our financial performance, because it allows them to compare our operating performance on a consistent basis across periods by removing the effects of our capital structure (such as varying levels of debt and interest expense, as well as transaction costs resulting from the business combination and other such capital markets based activities. Adjusted EBITDA and Further Adjusted EBITDA also seek to remove the effects of integration and related costs to achieve the savings, any expected reduction in operating expenses due to the business combination, asset base (such as depreciation and amortization) and other similar non-routine items outside the control of our management team. The Company does not consider these non-GAAP measures in isolation or as an alternative to liquidity or financial measures determined in accordance with GAAP. A limitation of these non-GAAP financial measures is that they exclude significant expenses and income that are required by GAAP to be recorded in the Company's financial statements. In addition, they are subject to inherent limitations as they reflect the exercise of judgments by management about which expenses and income are excluded or included in determining these non-GAAP financial measures and therefore the basis of presentation for these measures may not be comparable to similarly-titled measures used by other companies.

×

These non-GAAP financial measures are not required to be uniformly applied, are not audited and should not be considered in isolation or as substitutes for results prepared in accordance with GAAP. Net loss is the GAAP measure most directly comparable our non-GAAP measures. For reconciliation of the comparable GAAP measures to these non-GAAP financial measures, see the schedules to this release. Optimization & restructuring expenses and merger adjustments are primarily related to the implementation of strategic actions and initiatives related to the business combination completed on July 12, 2017. All of these costs are variable and dependent upon the nature of the actions being implemented and can vary significantly driven by business needs. Accordingly, due to that significant variability, we exclude these charges since we do not believe they truly reflect our past, current or future operating performance.
