Managed Print Services

Print Environment Optimization

Exela's Managed Print Services include a team of professional solution architects, client delivery managers, customer support representatives, and a large network of high-quality partners and equipment providers. Our team is uniquely suited to design, implement, and support onsite managed print solutions in complex environments, with a focus on productivity and reducing total cost of ownership.

OVERVIEW

Fleet Optimization

As an independent provider, we aren't concerned with selling you ink and equipment. Our focus is on providing **process insights** and **service support** so that you have everything you need, and nothing you don't. Our consultative and vendor independent approach ensures the correct OEM partner and device mix to achieve the highest productivity levels and the lowest overhead.

Cost Savings & Sustainability

Improved fleet and process efficiencies eliminate waste, **streamline inventory management**, and minimize the burden of print process administration to **reduce total cost of ownership**. Our sustainable print programs reduce energy expenditures and the number of print cartridges sent to landfills to help your company be a part of a sustainable global future.

Refining Print Policy

Optimal printing policies can reduce waste by up to 30 percent. Our process experts will work with you to develop printing rules that strike a balance between resource management and enduser satisfaction.

KEY FEATURES

Printing Solution Architects

Our solution architects build a visual representation of current device layout and a proposal for an optimized future state solution, based on your business needs and the data we gather in our initial site visit, including an analysis of current page volumes and cost metrics.

KEY FEATURES

Service Automation

Our system enables a proactive approach to regulating consumables, by continuously monitoring the status of all network connected print devices. An application sends alerts to our service desk when there is a performance issue or when a consumables threshold has been reached so that issues can be addressed before end users are interrupted.

Visibility and Reporting

A connected dashboard gives you access to activity and trends data for specified workgroups, warranty and lease information, service and repair history, and visual reporting capability for easy analysis. Maintain a global view over your entire printing environment, across all of your offices.

Security

Access controls and authenticated secure release limit exposure and reduce risk. Exela's service delivery team even offers secure equipment disposal services that include device-level data sanitization to ensure the confidentiality of your information.

BENEFITS

Access to experienced print solution architects

Optimized printing environments

Reduced cost of ownership

Improved turnaround times

Simplified printing processes

Enhanced printing security

Full process visibility and control
